

ESDAR MANUAL

Part One: Plenary sessions

Submission and acceptance of manuscripts

Manuscripts must be submitted electronically via the online submission site <http://mc.manuscriptcentral.com/rda>.

Please include the corresponding author's complete address and a valid email in the manuscript.

Additionally, the corresponding author must submit an Exclusive Licence Form. This form can be downloaded from the journal homepage (www.blackwellpublishing.com/rda). This form includes, among other items, your complete corresponding address and the copyright transfer agreement.

The firm deadline for all manuscripts is 1st of February 2009. No exceptions will be made! Please keep in mind that ESDAR will only reimburse speakers travel costs if the manuscript is submitted in time to be printed in the conference supplement of RDA.

Requirements for manuscripts

Format: The copies must be typed (Times, font 12) with double spacing *throughout* and with a margin of at least 3 cm on the left-hand side. Lines must be numbered in a consecutive manner starting on the first page, in the left-hand margin. All pages of the manuscript must also be numbered consecutively, including those containing references, tables, and captions to illustrations, all of which are to be placed after the text. Illustrations, both line drawings and photographs, are to be numbered as figures in a common sequence.

On page one of the manuscript the official name of the institution, the place where the work was carried out, the title of the article, and the names of authors must be stated as follows: Town, Country (no mailing address); Title of Article; Name A, Name B, and Name C. The title should be concise and appropriately informative and should contain all keywords necessary to facilitate retrieval by modern search techniques. Additional keywords not already contained in the title or contents (abstract, summary) may be listed beneath the contents. An abridged title suitable for use as a running head at the top of the printed page and not exceeding 50 letters and spaces should also be supplied. Each original paper and review shall contain a short contents (abstract, summary), preferably less than 250 words. The contents should not just recapitulate the results but should state concisely the scope of the work and give the principal findings, avoiding acronyms and references. The contents shall be complete enough for direct use by abstracting services.

Original articles should be structured in the following order: Title, Contents, Introduction, Materials and Methods, Results, Discussion, Acknowledgment and References. Placement of figures and tables should be indicated in the text. The experimental design should be described in sufficient detail (methods, analyses, statistics, breeds, origin, and management of animals etc.) to allow for repetition of the experiments.

If the paper is one of a numbered series, a reference to the previous part should be given as a footnote on the first page. If a part not yet published needs to be consulted for a proper understanding of the paper, a copy of that manuscript should be supplied to assist the referees. The corresponding address, and e-mail address if available, should appear at the end of the paper. Sets of identical data should not be given in tables and figures. Figures and tables should be accompanied by a legend.

The manuscript comprises a printout of the text, figures, tables, and a list of all figures and tables with their captions and titles on a separate piece of paper. We ask that you convey the essential information within the first 60 characters of the captions to accommodate the online edition. Each figure, table, and bibliographic entry must have a reference in the text. For all figures please include reproducible artwork (marked with the author's name, short title, and figure number). Any corrections requested by the reviewer should already be integrated into the file.

For further information please consult:

<http://www.blackwellpublishing.com/authors/journal.asp>

Length. Papers of the plenary sessions, including figures, tables and references, should not exceed **25** typed or computer-written DIN A4 pages. Longer text will be cut.

All specifications must be stated according to the S.I. System. Concentrations of chemical solutions are to be given in mol/l. All other concentrations should be given in % (volume or weight). All products implemented are to be mentioned with the manufacturer's name and delivery address which should appear in a footnote on the same page.

Any abbreviations of chemical, biological, medical, or other terms should only be employed when it is certain that they are internationally known. The full name must be stated in brackets when the abbreviation is first used.

All biological, medical, chemical, or other terms should be used according to the most recent recommendations of respective international nomenclature. Enzymes should be given according to the Enzyme Nomenclature (Elsevier Publishing Co., 1965). In the case of commercially obtained substances or reagents, the name and address of the manufacturer or supplier should be given as a footnote, when they are first mentioned in the text. Products (preparations etc.) with a registered trademark should be marked with ®.

Bacterial names should be in accordance with the latest edition of Bergey's Manual of Determinative Bacteriology (The Williams and Wilkins Co., Baltimore). Viruses are to be given the classification and names recommended by the International Committee on the Nomenclature of Viruses.

Original Photographs or drawings must be sharp and of high contrast. Figures should be saved in

a neutral data format such as TIFF or EPS, and a printout should always be included. Powerpoint and Word graphics are unsuitable for reproduction. Please do not use any pixel-oriented programmes. Scanned figures (only in TIFF format) should have a resolution of 300 dpi (halftone) or 600 to 1200 dpi (line drawings) in relation to the reproduction size. Please submit the data for figures in black and white. However, colour photos can be reproduced in black and white (with a possible loss of contrast). Colour graphics should be created using the CMYK colour palette (print colours), not RGB (monitor colours).

Reproduction in Domestic Animals offers authors the opportunity to reproduce colour figures in colour for free in the online version of the article (but they will still appear in black and white in the print version). If an author wishes to take advantage of this free colour-on-the-web service, they should liaise with the Editorial Office to ensure that the appropriate documentation is completed for the Publisher. As figures printed in colour are subject to an added charge authors must contact the local ESDAR conference organizer for clarification of payment. There is also a charge for alterations to figures when carried out by the publisher. Payment has to be negotiated in advance with the local ESDAR organizer.

Please note that figures will generally be reduced to fit within the column-width or the print area. This means that numbering and lettering must still be readable when reduced (e.g. maps) and that the scale might not correspond with the original (microscopic pictures), thereby invalidating references to scale in the text. If a figure is to be cropped, please mark the lines on a photocopy or tracing paper. Printouts should be made with a laser printer at the highest resolution (≥ 600 dpi). If artwork is to be scanned, line drawings should only be contour drawings without halftones (shades of grey). Please do not use patterns; rough hatching is possible.

Graphs with an x and y axis should not be enclosed in frames; only 2-dimensional representations. Do not forget the labels and units. Captions for the figures should give a precise description of the content and should not be repeated within the figure.

Tables should be created using the table function.

References: In the text, citations are listed chronologically by the author and date and are not numbered. All citations in the text must be listed at the end of the paper, according to the guidelines of the International Committee of Medical Journal Editors established in 1979. References should be listed in alphabetical order of the first author's name.

The following are examples of the styles required for citing a book chapter, a journal article, and an entire book. For conference proceedings, be sure to include the name(s) of the editor(s) of the proceedings, the publisher and the place of publication.

Ewald C, Apel G, von Mickwitz G, 1988: Erfahrungen mit der Vakzination gegen die Haemophilus-Pleuropneumonie der Stewing. Berl. Münch. Tierärztl. Wschr. 102 6-11.

Mair A, Diebschlag W, Distl O, Kräußlich W, 1988: Analysis of pressure distribution on the foot soles of cattle. J. Vet. Med. A 35 696-704.

Niemann H, Elsaesser F, 1983: Steroid hormones in early pig embryo development. In: Bavister BD (ed), The Mammalian preimplantation Embryo. Plenum Press New York, pp. 117-132.

Citations in the text should be given by placing in parenthesis the name(s) of author(s) and the

year of publication, e.g. (Thein and Härtl 1986), (Ewald et al. 1988), (Mair et al. 1988; Nieman and Elsaesser 1983).

All entries in the reference list must correspond to citations in the text. No editorial responsibility can be taken for the accuracy of the references, and authors are requested to check these with special care. Papers that have not been accepted for publication may not be included in the list of references and must be cited either as 'unpublished data' or as 'personal communication'. The use of such citations is discouraged. It is the author's responsibility to ensure that they have permission to cite material as a personal communication.

References in Articles - We recommend the use of a tool such as EndNote or Reference Manager to reference management and formatting. EndNote reference styles can be searched for here:

<http://www.Endnote.com/support/enstyles.asp>

Reference Manager reference styles can be searched for here:

<http://www.refman.com/support/rmstyles.asp>

Papers reporting work with animals should include a reference to the code of practice adopted for the experimentation. Editors will take account of ethical and animal welfare issues and reserve the right not to publish.

Authors are no longer required to assign copyright in their paper. Instead authors are required to assign the exclusive licence to publish their paper to Blackwell Publishing and *Reproduction in Domestic Animals*. Assignment of the exclusive licence is a condition of publication and papers will not be passed to the publisher for production unless licence has been assigned. (Papers subject to government or Crown copyright are exempt from this requirement). Please download the [Exclusive Licence Form](#) here.

Proof correction and offprints: When you receive proofs of your article, please check, sign, and return them to the Editor-in-Chief without delay. As changes to proofs are costly, we ask that you only correct typesetting errors.

Proofs will be sent via e-mail as an Acrobat PDF (portable document format) file. The e-mail server must be able to accept attachments up to 4 MB in size. Acrobat Reader will be required in order to read this file. This software can be downloaded (free of charge) from the following Web site: www.adobe.com/products/acrobat/readstep2.html.

This will enable the file to be opened, read on screen, and printed out in order for any corrections to be added. Further instructions will be sent with the proof. Proofs will be posted if no e-mail address is available; in your absence, please arrange for a colleague to access your e-mail to retrieve the proofs.

Authors will be provided with electronic offprints of their paper. Electronic offprints are sent to the first author at his or her first email address on the title page of the paper, unless advised otherwise; therefore please ensure that the name, address and email of the receiving author are clearly indicated on the manuscript title page if he or she is not the first author of the paper.
